

Abstract

Process and device for managing service data in a television system

The subject of the invention is a process for managing service data in a television system in which the said service data are transmitted.

The process comprises the steps:

- of acquiring service data and of storing the data acquired in a first database of a receiver;
- of copying service data stored in the said first database to a second database of the receiver for the updating of the said second base;
- of making the data stored in the said second database available to at least one application of the said receiver.

The subject of the invention is also a television receiver implementing the above process.
